FREE PRINTABLE CHECKLIST

10 SMART STORAGE IDEAS FOR SMALL BATHROOMS

A printable checklist showing simple ways to create extra storage without increasing room size.

- ☐ **Idea 1: Recessed Shower Tile Niches**
Utilize empty stud wall cavities inside shower zones for flush tiled shelving, keeping shampoo bottles off the floor.
- ☐ **Idea 2: Recessed Mirrored Medicine Cabinets**
Set mirrored cabinets into the wall above your basin to gain hidden 100mm depth storage without intruding on headspace.
- ☐ **Idea 3: Wall-Hung Vanity Units with Deep Drawers**
Free up floor area by mounting vanity units off the ground. Soft-close drawers provide organized storage for toiletries.
- ☐ **Idea 4: Over-the-Toilet Vertical Storage Shelves**
Maximize unutilized wall space above concealed WC cisterns with slim-line floating shelves or built-in cupboards.
- ☐ **Idea 5: Tall Vertical Heated Towel Radiators**
Use full vertical height for warming multiple folded towels simultaneously while replacing bulky central heating radiators.
- ☐ **Idea 6: Concealed Bath Panel Drawers**
Transform dead space under straight bath tubs by fitting removable magnetic or drop-down panels with integrated storage.
- ☐ **Idea 7: Inside-Cabinet Door Organizers & Hooks**
Attach adhesive racks or magnetic strips to cabinet doors to hold hairdryers, brushes, and grooming tools neatly out of sight.
- ☐ **Idea 8: Tiered Drawer Dividers & Organizers**
Prevent vanity drawer clutter by using acrylic or bamboo organizers to keep cosmetics, medicine, and toiletries separated.
- ☐ **Idea 9: High-Level Door-Frame Floating Shelves**
Install a shelf directly above the main bathroom door frame to store extra toilet paper rolls and clean towel reserves.
- ☐ **Idea 10: Corners & Nook Open Shelving**
Convert awkward architectural corners into functional storage zones using glass or timber corner shelves.
